

Welcome to OU Chemistry and Biochemistry!

Welcome to the website of the Department of Chemistry and Biochemistry. OU is the flagship university in the state of Oklahoma and we are one of its strongest units with an outstanding national reputation for quality research. We are a collegial department with 29 full-time faculty and over 110 graduate students. Norman is a great place to live! I invite you to explore the departmental webpages to learn more about our research offerings and teaching programs.

George Richter-Addo, Chair Current Events: Nov. 23, 2009
Biological Insights (and Novel Materials) from Molybdenum Chemistry, Charles G. Young, University of Melbourne, Australia

Dec. 3, 2009 Chromosome Structure, Integrity and Evolution, Douglas Koshland, Carnegie Institution of Washington/Howard Hughes Medical Institute Jan. 21, 2010 When Flavins Get the Blues, Ilme Schlichting, Max Planck Institute for Medical Research, Heidelberg, Germany

Feb. 4, 2010 Abiological Self-Assembly: Predesigned Metallacycles and Metallacages via Coordination, Peter Stang, University of Utah Feb. 11, 2010 TBA, Richard Eisenberg, University of Rochester April 1, 2010 Microfluidics and Bioanalytical Chemistry, Christopher Culbertson, Kansas State University

April 15, 2010 High Throughput Screening Meets Materials Science: Screening for Sol-Gel Materials and Sol-Gel Materials for Screening, John Brennan, McMaster University April 29, 2010 Structure and mechanism of pyruvate carboxylase, W. Wallace Cleland, University of Wisconsin
